Location
Rawalpindi, Pakistan

TECHNICAL SKILLS

Python (Flask, NumPy, Pandas)
C++ / C (DSA, Multi-threading, Sockets)
Databases (MySQL, SQL, Amazon RDS)
Web Basics (HTML, CSS)
AI/ML (NLP, LLMs, RAG, FAISS)
Cloud (AWS, Docker, Ubuntu)
IoT (ESP32, Sensors, Bluetooth)
Software Engineering (OOP, CRUD, Problem-Solving)

LANGUAGES

English (Intermediate)
Urdu (Fluent)

EDUCATION

BS Computer Engineering
IIUI, Islamabad
2022 – 2026
CGPA: 3.79 / 4.00

CERTIFICATIONS

✔ The Bits and Bytes of Computer Networking – Google
✔ Arduino Interfacing Workshop
✔ Raspberry Pi Workshop
✔ NVIDIA Jetson Nano Workshop

Professional Summary

Computer Engineering graduate proficient in Python with strong skills in backend development, databases and AI systems. Experienced with Flask, MySQL, AWS RDS and RAG-based applications. Passionate about building reliable and scalable software solutions.

WORK EXPERIENCE

AI Intern · Sybrid Pvt. Ltd. **(A Lakson Group Company)**

July 2025 – Sep 2025

- Developed a RAG-based chatbot for agriculture using LLMs and NLP pipelines on urdu dataset.
- Built data ingestion and knowledge base workflows .
- Developed REST APIs using Flask for chatbot deployment .
- Improved model performance and response accuracy.

SOC Analyst Intern · LMKR

July 2024 – Sep 2024

- Deployed ELK Stack and Elastiflow using Docker on Ubuntu.
- Performed penetration testing based on OWASP Top 10.
- Used Nmap, Burp Suite, Netcat, and Maltego for security analysis.
- Monitored real-time network traffic and logs.

KEY PROJECTS

Student Information Management System *2025*

- Designed normalized MySQL database with ER modeling and constraints.
- Built Flask web app for CRUD, attendance tracking and fee management.
- Applied SQL joins, aggregates and views for reports and CGPA calculation.

Cloud-Native Student Records System using Amazon RDS *2026*

- Deployed encrypted MySQL 8 RDS instance in private subnets with automated backups and snapshots.
- Configured three-tier Security Groups for secure app-to-database access.
- Built student records schema and ran complex SQL queries from EC2.

Multi-Threaded TCP Chat Server *2025*

- Developed a concurrent TCP chat server in C using pthreads and socket programming.
- Enabled real-time communication between multiple clients.
- Implemented multi-client handling and efficient thread management.

Corvit AI Chatbot *2026*

- Built AI-powered chatbot with RAG for Corvit course and career guidance.
- Integrated natural language queries with knowledge base and online search.
- Developed responsive web portal using HTML, CSS, JS and Tailwind CSS.

Customer Assistant Robotic Cart *2026*

- Developed an IoT-based smart shopping trolley using ESP32 for automation and real-time communication.
- Integrated HX711 load cells, IR sensors, DC motors, and L298N drivers for item detection, movement, and automated billing.
- Built a Flutter mobile app for real-time bill generation and Bluetooth-based trolley control, reducing manual checkout.

ACHIEVEMENTS & AWARDS

- **Star of IIUI** – Awarded for achieving the highest GPA in the class, International Islamic University Islamabad (Nov 2023)
